## QG2 2008 Quantum Geometry and Quantum Gravity Conference

**Monday June 30th - Friday July 4th 2008**

**University of Nottingham, UK**

### Topics:

**Quantum gravity, including loop quantum gravity, spin foam models, 1+1 and 2+1 quantum gravity, perturbative and discrete approaches. Quantum cosmology.**

**Quantum geometry, including physical aspects of non-commutative geometry, quantum groups and quantum topology. Non-commutative field theory and deformed special relativity.**

### Pages in this Section:

[Organisers](#)  
[Plenary Speakers](#)  
[Participants](#)  
[Abstracts](#)  
[Practical Information](#)  
[Registration](#)  
[Accommodation](#)  
[Timetable](#)  
[Contacts](#)  
[Poster](#)

The meeting is sponsored by the QG network of the European Science Foundation, the Gravitational Physics Group and the Mathematical and Theoretical Physics Group of the Institute of Physics and Classical and Quantum Gravity.

Classical and Quantum Gravity
